Abstract (en)

[origin: WO2021064231A1] A film, in particular a sealing film for foodstuff containers, comprising a base substrate and a coating provided at least indirectly on the base substrate, wherein the base substrate is made of a material containing PET and the coating contains a first component in the form of a saturated, high-molecular, linear copolyester compound A having an average molar mass of at least 10000g/mol, a second component in the form of a saturated, high-molecular, linear, plasticised copolyester compound B having an average molar mass of at least 10000g/mol, and a third component in the form of a polyolefinic copolymer.
