Abstract (en)

[origin: WO2021063911A1] The invention relates to a component (1) for an injection system, in particular a fuel distributor strip (1) for a fuel injection system, having a main body (2) which is processed by single-stage or multi-stage forging, at least one fastening element (25) being provided on the main body (2). According to the invention the fastening element (25) is formed at least partially by residual flash (26). Furthermore, the invention relates to an injection system having such a component (1) and a method for producing such a component (1).
