Abstract (en)  
[origin: EP3800434A1] The invention relates to a gun, in particular a carbine, comprising an upper housing (4) having a barrel (1), characterized in that the barrel (1) and the upper housing (4) are interconnected by means of a guide (6). In order to improve the connection, the guide (6) comprises corresponding prismatic guide surfaces (23) that extend in parallel with the barrel shaft (26) when the gun is mounted and ready to fire, and in that the barrel (1) is secured to the upper housing (4) by means of a tensioning element (20), which can rotate in the upper housing about an axis of rotation (19) that extends normally with respect to the gun center plane and comprises a tensioning portion (28) and an actuating portion (18).
