Abstract (en)  
[origin: CA3156363A1] The invention relates to an active element (1), in particular an active decoy element, comprising at least one active mass 101...n, and at least two ignition means 201...n each comprising a pyrotechnic set for igniting the active masses 101...n. The at least two ignition means 201...n are arranged on the at least one active mass 101...n and the at least two ignition means 201...n are connected to one another via channels 301...n, 311...n in such a way that the at least one active mass 101...n can be simultaneously ignited from multiple sides.
