Abstract (en)  
[origin: WO2021064203A1] The present invention relates to a connection unit (20) having a plurality of connection elements (21, 32) which are arranged next to one another, wherein each connection element (21, 32) has a conductor connection opening (24) for receiving an electrical conductor (26), and an operating element (25, 33) for clamping and/or releasing the electrical conductor (26) in the conductor connection opening (24), the operating elements (25, 33) and the conductor connection openings (24) are arranged on a common side (30) of the connection unit (20), the operating elements (25, 33) and the conductor connection openings (24) of the connection elements (21, 32) are arranged in two rows (29a, 29b) which are spaced apart from one another, and the connection unit (20) has at least one first connection element (21a, 32a), the operating element (25, 33) of which is arranged in a first row (29a) and the conductor connection opening (24) of which is arranged in a second row (29b), and at least one second connection element (21b, 32b), the operating element (25, 33) of which is arranged in the second row (29a) and the conductor connection opening (24) of which is arranged in the first row (29b). The present invention also relates to a connection block having a housing (22) and a plurality of connection elements (21, 32) which are accommodated in the housing (22).
