Abstract (en)

[origin: EP4039110A1] [Problem] To provide a mechanism with which it is possible to collect information of a suction device selectively.[Solution] A control device comprising a control section that controls a transmission process of transmitting suction information, which is information acquired with regard to suction carried out using a suction device, each time the suction information is acquired. The control section controls a transmission source of the suction information so that the suction information satisfying an exclusion condition set by a user is excluded from the suction information to be transmitted in the transmission process.
