Abstract (en)

The present invention relates to a method for the production of a tamper-proof envelope (100) of heat-weldable material and comprising the phases of:- Feeding at least one tape (N) of heat-weldable material along a processing path and positioning a lower sheet (106) of said heat-weldable material on top of an upper sheet (105) of said heat-weldable material;- Welding (102, 103) for forming the envelope and application of an adhesive strip (105, 106) for creating the tamper-proof closing of the envelope;- wherein, along said processing path, the welding phase is carried out first and, subsequently to said welding phase, the application phase of the adhesive strip is carried out.
