Abstract (en)

The invention relates to an assembly comprising- a container (1) made of blow-molded plastic material and including a neck (2) comprising a dispensing orifice (5), a support collar (6), a coupling washer arranged between the support collar (6) and the dispensing orifice (5), a cylindrical part (8) arranged axially between the support collar (6) and the coupling washer; and- a capping device comprising a lower ring that is retained between the coupling washer and the support collar and that cooperates with the cylindrical part, a cap, a linking device that joins the cap to the lower ring in which the cylindrical part (8) has an inside diameter between 24 and 28 mm, an outside diameter between 25.6 and 30.4 mm and a height between 2.70 and 3 mm.
