Abstract (en)

[origin: WO2021069531A1] The invention relates to a bicycle attachment system (100) comprising: a holder (10) for receiving a smartphone (110) and for holding the smartphone (110) on a bicycle stem (120), wherein the holder (10) has at least one mounting region for mounting the holder (10) on the bicycle stem (120); at least one display (20) integrated in the holder (10) for visualising bicycle operating data; a display control device for controlling the at least one display (20); and a data interface for data communication between the smartphone (110), which can be received by the holder (10), and the display control device. The invention also relates to a smartphone (110) and a smartphone programme. The invention also relates to a bicycle attachment assembly (200) comprising the described bicycle attachment system (100) and a smartphone (110), and to a bicycle comprising such a bicycle attachment assembly (200).
