Abstract (en)

[origin: WO2021070207A1] Plant for producing and packaging paper rolls obtained from the cutting of logs of paper material, comprising formation means for the production of logs of paper material consisting of a winding of a predetermined amount of paper material, cutting means for transversal cutting, packaging means of said rolls for producing packages comprising a predetermined number of rolls and bundling or cartoning means for bundling or cartoning said packages, wherein the means for the production of the logs comprise a rewinder (501) fed with the web of paper material wrapped to form the logs. Said cutting means, said packaging means, and said bundling or cartoning means are grouped into two modules (ML, MU) on two superimposed floors (LB, LU) of the plant downstream of the rewinder (501).
