Abstract (en)
[origin: WO2021094013A1] The invention relates to an on-load tap changer (1) for uninterrupted load switching, comprising: a first module (20) having a first module shaft (22); a second module (40) having a second module shaft (42); wherein: the first module shaft (22) actuates the first module (20); the second module shaft (42) actuates the second module (40); the first and second module shafts (22, 42) are mechanically coupled to one another in such a way that the first module shaft (22) drives the second module shaft (42) and the second module (40) is actuated with a time delay relative to the first module (20).
