Abstract (en)

[origin: WO2021075962A1] Watercourse with water flowing in a flow direction, wherein the watercourse comprises a bubble screen provided at an angle relative to the water flow direction, wherein the bubble screen substantially extends from a water guide element to another water guide element, wherein a downstream part of the bubble screen is provided with a collection area, and wherein a bubble intensity of the downstream part of the bubble screen is less than the bubble intensity elsewhere in the bubble screen.
