Abstract (en)

[origin: WO2021074215A1] The invention relates to a profiled taping knife handle (100) comprising two profiles that are movable relative to one another: • a first engagement profile (10) comprising an attachment portion (130) for attaching a taping blade (200), said attachment portion being connected to a central portion (120) that is integral with a first engagement portion (111) engaging a gripping part (110) that forms an open hook having an arc-shaped inner surface (111a), • a second lever profile (20) that constitutes a second lever portion of the gripping part (110) and comprises a cylinder (21) complementary to the hook of the first portion (111), and an elongate lever body (22), and in that the taping knife handle comprises means (30, 31-32-33) for preventing one profile from rotating relative to the other profile in at least two different angular positions.
