Abstract (en)

[origin: WO2021074636A1] An apparatus for supporting a floor or temporary structure including: a first member (10) for supporting the apparatus on a surface including an upwardly extending elongate portion; a second member (100) for supporting a floor or temporary structure at a height; said second member having a lower end and an upper end; wherein the second member defines a space within which the upwardly extending elongate portion is received; and a height adjustment device for adjusting a distance between the first and second members which is connected to the second member to effect a change in the height.
