Abstract (en)
[origin: WO2021074909A1] The present invention relates to an electric actuating unit comprising: - a functional support (1) that has a first receiving element (101); - an electromagnetic coil arrangement (3) that is fixedly attached to the first receiving element (101); and - an arrangement (5) of permanent magnets, which is arranged concentrically about the electromagnetic coil arrangement (3), in a rotor housing, said arrangement (5) having a rotor shaft (51) that is rotatably mounted in the first receiving element (101), wherein the electromagnetic coil arrangement (3) and the arrangement (5) of permanent magnets in a rotor housing form an external rotor motor.
