Abstract (en)
[origin: WO2021078634A1] The invention relates to a hair-styling appliance comprising: a main body (1) including a handle (11) extending longitudinally along a first axis (P-P'); an air-moving device for creating an airflow between an air inlet (110) and an air outlet (24); and an accessory (2) intended to come into contact with the hair so as to style same, said accessory (2) extending longitudinally along a second axis (A-A'), the main body (1) comprising the air inlet (110) at a free end and the accessory (2) comprising the air outlet (24), characterised in that the accessory (2) is movable between at least two positions that are stable and established according to the design, namely: - a first position in which the second axis (A-A') and the first axis (P-P') form a straight angle therebetween, and a second position in which the second axis (A-A') and the first axis (P-P') form an angle different from the straight angle therebetween.
