Abstract (en)

The need for a liquid hand dishwashing composition which provides for a multi-phase hand dish-washing composition which is more readily emulsified and re-separate upon standing and provides improvements in skin-care, especially moisturisation during use, is met by formulating the liquid hand dishwashing composition as a multi-phase composition comprising a first phase and a second phase comprising vegetable oil which comprises glycerides formed from fatty acids having a number average alkyl chain length of less than 14 carbon atoms.
