Abstract (en)
According to an aspect of the present disclosure, there is provided a timepiece including: an hour hand and a minute hand, a dial having a plurality of time scales for displaying time of day by being indicated by the hour hand and the minute hand, and an auxiliary hand having a shaft member disposed at a position overlapping with at least one of the time scales in plan view as viewed in a direction along an axis of the hour hand and the minute hand, the auxiliary hand being configured to indicate information other than the time of day by rotating about the shaft member serving as an axis of rotation.
