Abstract (en)

[origin: CA3156107A1] An infusion cannula unit (1) made of plastic comprises a cannula (2) for insertion in a blood vessel. A housing (4) of the unit has a supply line portion (5) the line axis (6) of which runs at an angle relative to a cannula longitudinal axis (3), said angle being greater than 10°. The supply line portion (5) is in fluid communication with a lumen (9) of the cannula (2). The infusion cannula unit has a one-piece design, resulting in a unit which is easy to produce and in particular suitable for mass production.
