Abstract (en)

[origin: WO2021083759A1] The invention relates to a system for managing air quality (2) in a passenger compartment of a vehicle (1) on a predetermined route, comprising acquisition means (3) capable of acquiring data relating to the pollution around and inside the vehicle (1) on said route, calculation means (4) capable of determining the level of air pollution around and inside the vehicle (1) on the basis of said data, characterised in that it comprises control means (6) capable of recycling the air in the passenger compartment as a function of the variation in the level of air pollution around and inside the vehicle (1).
