Abstract (en)
[origin: WO2021083698A1] The invention relates to a vehicle (10) with at least one air inlet opening (20) for admitting ambient air (U), at least one air outlet opening (50) for discharging the ambient air (U), and an air-cooled cooling device (30) connected to the air inlet opening (20) and the air outlet opening (50) for cooling one or more vehicle components (40). According to the invention, the air outlet opening (50) is equipped with at least one guide means (51), which is adjustable and is pivoted automatically or in a manner driven by an adjustment means (70) on the air outlet side into a forward travel position when the vehicle (10) is travelling in a direction of forward travel (VFR) and into a reverse travel position, which differs from the forward travel position, when the vehicle (10) is travelling in a direction of reverse travel.
