Abstract (en)

[origin: WO2021083663A1] The present invention relates to a method for securing (100) rental of a vehicle and/or protective equipment for the user of the vehicle which are provided with a processor. The processor comprises a central processing unit and a rewritable memory. The securing method (100) comprises a step of uploading (101) connection data (200) to the processor when payment for the rental (300) is made. The connection data (200) comprise a microprogram (210) that is required for operating the vehicle and/or the protective equipment for the user of the vehicle. The microprogram (210) is stored in the rewritable memory of the processor. The method also comprises a step of deleting (102) the microprogram (210) from the connection data (200) on the processor when a delete order (400) is given to the processor.
