Abstract (en)
Provided is a tobacco filler for heat-not-burn tobacco products that is capable of efficiently delivering a flavor component contained in the tobacco filler to a user. Specifically, the tobacco filler for heat-not-burn tobacco products contains a tobacco material and an aerosol generation substrate, said tobacco filler containing a lipid-containing aerosol stabilizer. The proportion of saturated fatty acids having 16-18 carbon atoms in the lipids contained in the aerosol stabilizer is 50% by weight or more.
