Abstract (en)
The invention relates to a toothbrush head and manufacturing method, having a head with bristles (3) that is coupled to a gripping handle (4), said head (2) comprising two opposite bases, an outer one (5) and an inner one (6), which are linked to each other by means of a central bridge (7) that defines an intermediate separation space (8) therebetween, there being a set of outer bristles (3a) and another set of inner bristles (3b), which emerge facing each other from the respective inner faces of said opposite bases (5, 6), and a set of central bristles (3c) emerging from the central bridge (7) and perpendicular to the rest of bristles (3a, 3b).
