Abstract (en)

The invention relates to an ironing device for ironing laundry to be ironed, comprising:- a heated ironing bed, preferably formed between at least one ironing roller and at least one trough;- a supply conveyor bed for conveying the laundry to be ironed to the ironing bed;- a discharge conveyor bed for conveying the laundry to be ironed away from the ironing bed;- a preheater for preheating the laundry to be ironed on the supply conveyor bed;- a heat recovery device for recovering heat emanating from the laundry to be ironed on the discharge conveyor bed; and- a heat transfer device for transferring heat from the heat recovery device to the preheater. The invention furthermore relates to a method for ironing laundry to be ironed and an energy-saving system for an ironing device.
