Abstract (en)  
Electric power cable connector arrangement (1) comprising a first electric power cable (100) comprising a first connector (110) having first concentric electrical conductors (120) mutually insulated, the first concentric electrical conductors (120) having a first power electric connection portion (130); a second electric power cable (200) comprising a second connector (210) having second concentric electrical conductors (220) mutually insulated, the second concentric electrical conductors (220) having a second power electric connection portion (230); a connecting element (300) releasably connecting the first connector (110) and the second connector (210) along a coupling direction (X-X) to connect the first electric power cable (100) with the second electric power cable (200); the first connector (110) comprises a first ground conductor (140) surrounding the first concentric electrical conductors (120) and extending beyond the first power electric connection portion (130) towards the connecting element (300) along the coupling direction (X-X); the second connector (210) comprises a second ground conductor (240) surrounding the second concentric electrical conductors (220) and extending beyond the second power electric connection portion (230) towards the connecting element (300) along the coupling direction (X-X).
