Abstract (en)

[origin: WO2021089100A1] The invention is a fire-extinguishing device generally used on aircraft landing strips in the field of safety and control. It operates automatically or directly and can be used by anyone. It is easy even for people with disabilities to use and simple to maintain and to install on fixed or mobile platforms (5), alone or in series, or suspended with a helium gas balloon (1) or in a helicopter. It can be installed with any logic control system (23) connected to a supply of water, foam, or powder or to extinguishing-gas pipes. It is used with the addition of accessories on aircraft runways and installations exposed to fire, or on walls. This will all help to preserve the safety of people and the public good.
