Abstract (en)

[origin: WO2021089904A1] A method for controlling operation of an abrading system (500) comprises: - providing an abrading head (300), which comprises an abrading device (200) and a communication unit (MOD1), - providing parameter data (PAR1) associated with the abrading device (200), - storing the parameter data (PAR1) into a memory (MEM2) of the communication unit (MOD1), - transporting the abrading head (300) to an abrading site (SITE1), - electrically connecting the abrading head (300) to a driving unit (400) at the abrading site (SITE1), - transferring the parameter data (PAR1) from the communication unit (MOD1) to the driving unit (400) at the abrading site (SITE1), and - driving an electric motor (MOTOR1) of the abrading device (200) with the driving unit (400) according to the parameter data (PAR1).
