Abstract (en)

[origin: EP4056064A1] The present invention discloses a structure of a mannequin shoe with improved decorativeness and convenience. The mannequin shoe according to an embodiment of the present invention comprises: a front and rear guide member including a front guide surrounding a toe portion of a mannequin foot, a rear guide surrounding a heel portion of the mannequin foot, and a connecting portion connecting between the front guide and the rear guide as one body, and a side guide member surrounding a left and right side portion and a sole portion of the mannequin foot and worn on the mannequin foot along with the front and rear guide member. Accordingly, the present invention can provide a mannequin shoe with improved decorativeness and convenience including configurations that can have an aesthetic effect of looking like that an actual human shoe is worn on the mannequin when viewed from the outside, that can reduce the manufacturing cost and replacement cost of the mannequin shoe for display, which need to be changed frequently according to the season or fashion, and that can shorten the replacement time.
