Abstract (en)

An obstruction for preventing entry of animals in an opening defined by a curved roof tile is disclosed. The obstruction has an obstruction plate for at least partially obstructing the opening; a bendable leg extending from a top of the obstruction plate, the bendable leg being integral with the obstruction plate; and a clip defining an aperture. The bendable leg passes through the aperture. The clip is selectively slidable along the bendable leg. The clip is configured for clipping onto the curved roof tile.
