Abstract (en)

[origin: WO2021093933A1] The invention relates to a method for producing a three-dimensional structure that reproduces a character string, the characters being arranged and shaped relative to each other, wherein offset surfaces of the characters are used, the offset surfaces are arranged such that they touch or overlap, a monolith is formed therefrom, and the monolith is shaped. The invention further relates to different devices and to an application for implementing the method.
