Abstract (en)

[origin: WO2021093938A1] The invention relates to a waste container (10), comprising a cartridge-receiving region (32), into which a refill cartridge (100) containing tubular material (104) can be inserted, a sealing mechanism (36), by means of which a bag portion (112) of the tubular material (104) can be sealed, said bag portion protruding from a refill cartridge (100) inserted into the cartridge-receiving region (32), and an actuation device (24), by means of which the sealing mechanism (36) can be manually actuated. The waste container (10) comprises a locking device (50) for the sealing mechanism and/or the actuation device. The locking device is held in a release state by means of an unlocking element of a compatible refill cartridge.
