Abstract (en)

[origin: WO2021181014A1] A device (1) for covering a swimming pool (2), the device (1) comprising a flexible element (4), secured to a receiving structure (3), and intended to adopt a deployed position, wherein the flexible element (4) is intended to at least partially cover the swimming pool (2), and a retracted position rolled up inside the receiving structure (3). According to the invention, the flexible element (4) is rolled up in a planar and oblong configuration around two parallel rotating bars (6), coupled in rotation to, and spaced apart from, each other.
