Abstract (en)
[origin: WO2021092675A1] A method and system for providing audio information to a mobile device relating to geographical elements at the geo-location coordinates of a location on a map on a screen on the device. The geo-location of the mobile device is detected using a GPS signal or using one or more Bluetooth® beacon. The method and system provide for selecting and sending electronic files to the device relating to different geographical elements at the geo-location coordinates.
