Abstract (en)

[origin: WO2021113272A1] An apparatus and method are provided for a wireless electrical stimulation. The apparatus generally includes an electrical stimulator, two electrodes coupled to the electrical stimulation unit and a wireless remote controller for controlling the electrical stimulation unit. After paring the wireless remote controller, a first user of a first category may set a first configuration for the electrical stimulation unit by using an application running on the wireless remote controller. And a second user of a second category may use the electrical stimulation unit based on the first configuration.
