Abstract (en)
[origin: WO2021099112A1] The invention relates to a filter unit for an air cleaning device. The filter unit (1) has an odor filter (2) for neutralizing odors, said odor filter constituting a plasma generating device. The invention is characterized in that the odor filter (2) comprises at least one air-permeable high-voltage electrode (20) and at least one air-permeable counter electrode (21), each of which is made of a flat element, and the at least one air-permeable high-voltage electrode (20) and the at least one air-permeable counter electrode (21) are arranged one behind the other in the flow direction. The invention additionally relates to an air cleaning device comprising such a filter unit (1).
