Abstract (en)  
[origin: WO2021099696A1] Method for producing a spray wall (26) drilled with a network of holes (O) for the pressurised fluid substance to pass through so as to be sprayed in fine droplets, the method comprising the following steps: a) moulding a nozzle (2) comprising a front wall integrally formed with a mounting wall (21), the mounting wall (21) surrounding the front wall, the front wall having a curved initial configuration upon removal from the mould, b) drilling the curved front wall with a network of holes having a defined initial orientation, c) deforming the drilled curved front wall into a final spray configuration defining a spray wall (26), the defined initial orientation of the holes being subsequently modified.
