Abstract (en)

[origin: WO2021099673A1] The invention relates to a method for coating a steel plate with another steel plate, wherein at least one surface of a steel plate (11) to be coated is provided with another, coating steel plate (12) by welding. The method according to the invention comprises: - placing the coating steel plate (12) on top of the steel plate (11) to be coated in such a way that the surface of the coating steel plate (12) comes against the surface of the steel plate (11) to be coated; - welding the coating steel plate (12) to the steel plate (11) to be coated by welds (14) at welding points (13) inside of the edges of the coating steel plate (12). The invention also relates to a steel plate coated with another steel plate (10), as well as to a vessel made of a steel plate coated with another steel plate (10) according to the invention.
