Abstract (en)
[origin: WO2021099700A1] Disclosed is a land vehicle (V) comprising: - a powertrain comprising a combustion-type driving machine (MM1) providing torque for a set (T1) of drive wheels via a coupling device (DC1) and a gear shifting device (DCR) that can be controlled electronically, and - at least one computer (CA) prohibiting a request to place the coupling device (DC1) in an open state decoupling the first driving machine (MM1) from the gear shifting device (DCR) when the coupling device (DC1) is in a closed state coupling the driving machine (MM1) to the gear shifting device (DCR) and as long as a prohibition to shift from an engaged gear is in effect.
