Abstract (en)

[origin: WO2021099364A1] The invention relates to transfer equipment (50) for self-propelled carriages (1) on a network (1000) similar to an elevated railway, wherein the network (1000) has at least one track element (106, 108) and at least one intersection, reversing or end point, in the area of which the self-propelled carriage (1) can be transferred from the at least one track element (106, 108) onto an adjustably arranged support unit (25a to 25d).
