Abstract (en)

[origin: WO2021099596A1] The invention relates to a conveying means (1) for conveying a load, in particular in the form of a person and/or cargo, having a housing unit (10), by means of which a load area (11) is formed for accommodating the load, and a drive device (20) for moving the conveying means (1), comprising at least one first rotor unit (21) which can be driven for a flight operation (110) of the conveying means (1). The invention additionally relates to a method (100) for conveying a load.
