Abstract (en)
[origin: WO2021099358A1] The invention relates to a container closure (11) for closing the pour opening (33) of a container (13), having – a screw cap (15) with a free edge (25) – a security ring (17) that is connected by means of break-off webs (63) to the free edge (25) of the casing (15) and has engagement means (37), – a first holding strip (19a) with a first and a second end (39, 41), wherein the first end (39) is fixedly connected to the free edge (25) of the screw cap (15) and the second end (41) is fixedly connected to the security ring (17) and – a second holding strip (19b) with a third and a fourth arm end (51, 53), wherein the third end (51) is fixedly connected to the free edge (25) of the screw cap (15) and the fourth end (53) is fixedly connected to the security ring (17). The first, second, third and fourth ends (39, 41, 51, 53) are arranged one after the other in the circumferential direction on the free edge (25) and on the security ring (17). A first tongue (43) that has a first tongue end (45) and a second tongue (47) that has a second tongue end and adjoins the first tongue (43) are arranged between the second and the third end (41, 51). The second tongue (47) is part of the security ring (17) and in the open position the first tongue end (45) comes into contact with the second tongue end (49).
