Abstract (en)

[origin: WO2021099326A1] The present invention relates to an assembly for transporting and separating living poultry birds, in particular chickens. According to the invention, this assembly comprises: - a first conveyor (10) for conveying the poultry birds, - a carousel (12) comprising a rotating platform (14), said carousel (12) being configured to ensure, during the rotation of this platform (14), spatial separation of the poultry birds introduced at the inlet thereof so as to line them up one after another, - an ejector (18) for ejecting the poultry birds thus separated from the carousel (12) onto an evacuation conveyor (19) and aligning them.
