Abstract (en)

[origin: WO2021099442A1] The invention relates to an arrangement (10) for a vehicle opening leaf comprising a lock (11), a lever (12) for actuating the lock, an opening control (14), a means (13) for transmitting movement between the actuating lever (12) and the lock (11), an outer panel (3), an immobilizing means (20) for preventing the actuating lever (12) from pivoting such that in the event of an impact (F) on the outer panel (3), the actuating lever (12) is held towards or at a rest position, the immobilizing means (20) comprising a first part (21) and a second part (22), the first part (21) being designed to slide relative to the second part (22) in the event of such an impact (F).
