Abstract (en)

[origin: WO2021099116A1] The present invention relates to an extractor device comprising an extractor housing (2), at least one vapour/fume conduction panel (3) that is detachably held in the extractor housing (2), and at least one illumination device (4) having at least one light source (430), the extractor device being characterised in that: the vapour/fume conduction panel (3) constitutes a light guide; the illumination device (4) is provided below the vapour/fume conduction panel (3); the at least one light source (430) faces the lower edge (30) of the vapour/fume conduction panel (3); and the illumination device (4) is detachably fastened to the extractor housing (2).
