Abstract (en)
[origin: WO2021098971A1] The invention relates to an electronic label (1), comprising a housing (2). The housing has a front wall (3), a rear wall and a side wall (5). The front wall (3) has a screen (3A), which, in particular, is reflective. In contrast to the front wall (3) and the rear wall, the side wall (5) conducts light. A light source for emitting the light that can be produced by means thereof through the side wall (5) is positioned within the housing. The side wall (5) is inclined toward the front wall (3).
