Abstract (en)
[origin: CN113017375A] The invention relates to the technical field of cups, and discloses a cup cover and a cup thereof. The cup cover comprises a main cover body and a cover side wall surrounding the main cover body along the periphery of the main cover body, the main cover body is in an inverted cylinder shape and comprises a top face and a side wall part, a drinking hole and a direct drinking hole which are connected are formed in the top face, a first sealing part covers the drinking hole, the direct drinking hole is covered with a second sealing part, and a parting line is arranged between the first sealing part and the second sealing part; the side wall part of the main cover body abuts against the inner wall of the cover side wall, and the bottom of the cover side wall is folded inwards to wrap the side wall part of the main cover body; and a locking convex ring which protrudes inwards is arranged on the inner wall of the side wall part of the main cover body. Before the cup cover is used, food in the cup can be prevented from leaking or being polluted, and the cup cover is convenient to open for eating during use; a user can drink water through the drinking hole or directly drink water through the direct drinking hole by using a straw, the structure is simple, and the use is convenient.
