Abstract (en)
[origin: WO2021105449A1] The invention provides a consumable for use with a non-combustible aerosol provision device, the consumable comprising: a first aerosol-generating material; and a second aerosol-generating material, wherein each of the first and second aerosol-generating materials comprise an amorphous solid, the amorphous solid comprising: 0.5 - 60 wt % of a gelling agent; 0 - 80 wt % of an aerosol-former material; and 0 - 60 wt % of at least one of an active substance, a flavourant and an acid; wherein these weights are calculated on a dry weight basis and wherein the amorphous solid of the first aerosol-generating material has a composition different from a composition of the amorphous solid of the second aerosol-generating material.
