Abstract (en)
[origin: WO2021105470A1] The invention provides a method of making an amorphous solid comprising: (a) forming a slurry comprising: 0.5-60 wt% of a gelling agent; 5-80 wt% of an aerosol forming material; and 0-60 wt% of an active constituent and/or flavourant; wherein these weights are calculated on a dry weight basis; (b) shaping the slurry; (c) applying a setting agent to a surface of the slurry so that the slurry sets to form a gel; and (d) drying the gel to form an amorphous solid; wherein the amorphous solid has a substantially constant concentration of setting agent throughout.
