Abstract (en)

[origin: WO2021107797A1] The invention relates to a packaging with a ball type applicator, consisting of a container (1) with a threaded neck (2) in its upper portion, a socket (3) which is at its lower portion internally threaded and it is screwed onto the threaded neck (2), and a ball (4) seated in the socket (3). The invention is characterized in that the container (1) is made of a cardboard, and the threaded neck (2) is a separate plastic element glued into the upper portion of the container (1).
